Sabás Mendívil

Full-Stack Software Engineer | TypeScript, Node.js, React

Hermosillo, Sonora, Mexico | Professional English | Native Spanish
sabasmendivil.com | github.com/sabasm

PROFESSIONAL PROFILE

Full-stack software engineer combining hands-on product development, technical leadership and a communication-first approach.

EXPERIENCE

Softeq | JavaScript Unit Leader | 2022-2024
Led a JavaScript/TypeScript engineering unit at Softeq, combining hands-on development, mentoring, code review, technical interviews and client collaboration.

Streamline VRS / Inhabit | Software engineering contributions
Contributed to property-management and vacation-rental web applications, including owner dashboards, reservation workflows, occupancy reporting and frontend reliability.

Pitaya Ventures | Co-founder & COO | 2019-2022
Co-founded Pitaya Ventures and developed Localsumer using the MERN stack, connecting software delivery with operations and product decisions.

TECHNICAL SKILLS

TypeScript | JavaScript | Node.js | NestJS | React | Next.js | Angular | RxJS | REST APIs | PostgreSQL | MySQL | MongoDB | Redis | Prisma | TypeORM | Docker | AWS | Jest | Testing Library | GitHub Actions

INDEPENDENT PROJECTS

MENAC | In development | Independent project
Independent exploration of modular application architecture, agent workflows and shared engineering capabilities.

Repository OS | In development | Independent project
Repository governance work centered on versioned policies, local validation, explicit evidence and repeatable developer workflows.

Localsumer | Previous venture | Owner-reported
A MERN-based product developed within a co-founded venture, combining software engineering, product thinking and business operations.

EDUCATION

Bachelor's degree in Communication Sciences.
Full-Stack Web Development certification, Ironhack.
